

# Marine Technologies

Plextek is the development partner of choice for 300+ major global organisations, government bodies, and ambitious companies.

## Delivering Resilient Solutions

Plextek has been providing marine-based technology solutions to clients for over 20 years. We have worked on exciting developments like surveillance & monitoring, long range communications systems, location beacons, protecting marine assets and counter-UAS. Our speciality is helping you to solve really difficult engineering challenges through bespoke solutions that can cope with harsh environments and complex external factors.

## Our Expertise

Evolving market dynamics, technological advancements, changing customer requirements and new business models are creating opportunities for the marine industry. Companies often look for cost effective, and ready to deploy, off the shelf solutions. Existing platforms provide sound bases to develop straightforward solutions, solving many technical challenges. However, when companies need to create future proof, robust, scalable, efficient, and flexible solutions that meet specific demands of size, weight, power, cost, and certification – off the shelf solutions cannot stand the test. Plextek works with customers to create specialised innovative solutions in highly demanding technologies like RF, smart sensors, signal processing and antennas.

## About Plextek

We have a 30 year history of providing technology solutions to a variety of organisations and industries. Plextek understands today's key challenges for smarter technology development and can generate both the ideas and deliverable solutions to the assured level of security, performance, resilience and ergonomics that you need. We are a product development & consulting company that works with clients to achieve results based on their specific requirements. Our engineering experience, supported by our library of IP for key technology elements, aids accelerated time to market and greater cost effectiveness.

## Contact

If you are interested to know more about how Plextek can help you achieve your technology goals, please contact [hello@plextek.com](mailto:hello@plextek.com) to discuss your objectives further.
